

Audit & Assurance

One of our key services is our Audit & Assurance practice. There are numerous ways in which a properly executed audit adds value to customers' businesses, making it an attractive procedure for any organisation to use.

The audit process is an independent examination of the financial statement of any entity, whether profit oriented or not and irrespective of its size or legal form when such an examination is conducted with a view to expressing an opinion thereon.

We're designing and implementing a customised audit plan that focuses on the areas of your business that significantly impact your financial statements.

- Statutory / External audit
- Special purpose audit (includes Donor Requested Audits)
- Inventory Audit
- Forensic Audit
- Due Diligence & Review
- Internal control audits according to regulations & international standards
- Agreed-upon procedures
- Compilation of reports
